

To whom it concerns, Please Reject the NAB's petition 04-160. I subscribe to XM radio and pay for the service. I am trying to understand why radio is different from the cable TV service that offers similar weather and traffic. Shouldn't I be able to pay for and receive the services that I want. The traffic report is there when I need it not 5 minutes after I have already entered the highway. This service may also help reduce the horrible traffic faced by DC commuters every day. Thanks, Teresa
